Question 24

24. What is the name of the predominate biome in California (Spanish for thicket)?

Question 25

25. If the average rainfall in an area is around 4-5 feet per year, and the temperature varies only +/-9.5 degrees, what biome would you be in?

Question 26

26. What is the typical biome found circumventing the Earth at 80N degrees latitude?

Question 27

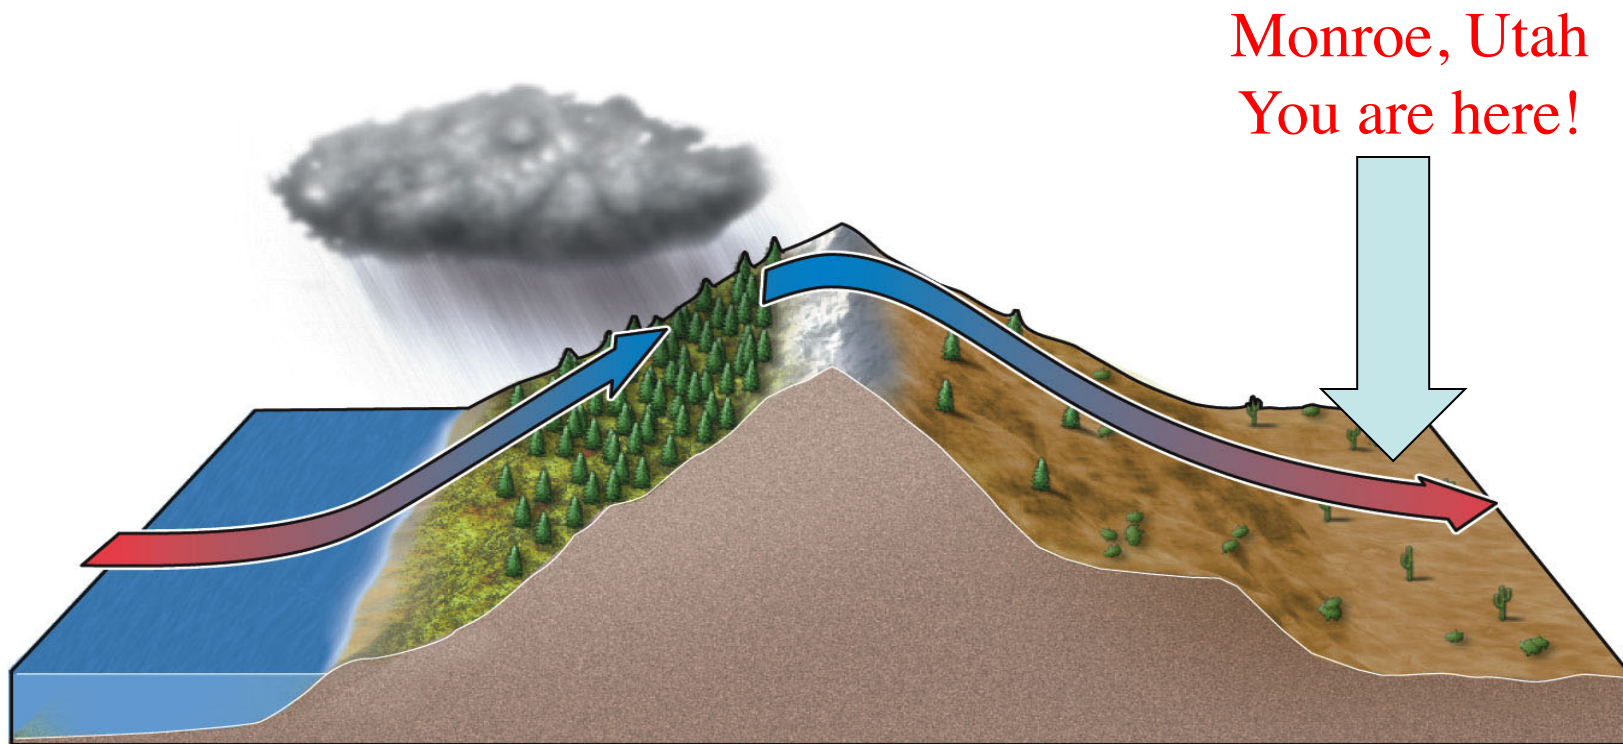

27. What biome covers most of Greenland?

- A. Tundra
- B. Boreal Forest
- C. Tropical Rainforest
- D. Snow and Ice

Question 30

30. Name one important feature (from an ecological standpoint) of swamps, marshes, bogs, and fens.

32. The picture below depicts what climatic condition?

Question 34

34. What biome would you be in if the trees were growing right in the water, and an alligator was chomping on your foot?

Question 35

35. Look at the picture. This is an example where two distinct biomes meet. This area is called a/an _____.

- A. Ecosystem
- B. Ecotone
- C. Estuary
- D. Continental Divide

Question 36

36. What biome makes up most of Japan?

- A. Tropical Rainforest
- B. Temperate Deciduous Forest
- C. Cold Desert
- D. Grassland

Question 37

37. What biome would you be in if you visited Brazil?

Question 38

38. What biome would you be in if you went to Kenya?

Question 40

40. What biome would you be in if you visited Central Mexico?
